

Outline for Issue of How Did We Get Where We Are Today?

- I. First we must define “Where Are We Today?” that is of great Concern
What follows is a non inclusive list of some ten issues that now likely impact the future survival of our nation.
 - A. Corruption is Top Down from Federal to States to local governments.
 1. Presidents are actually guilty of bribery, misuses of power for prosecution of perceived political enemies, and selling out the country for financial gain aka treason.
 2. Military Industrial complex creates an almost constant state of war which enriches local and foreign allies and uses up our finest military manpower and national resources. However, war time Presidents are historically re-elected.
 4. Prior to President Trump, several previous Presidents, VP’s, and their minions in particular became incredibly wealthy selling out jobs of Americans and making our nation dependent upon countries who are perceived to be now or in the future as mortal enemies.
 5. Presidents and high level officials are so focused upon their personal and party interests they are oblivious to the danger they cause in challenging nuclear powers such as Russia while clumsily supporting Ukraine. That was an avoidable war.
 6. Unholy alliance with Mega-billionaires who have no loyalty to our country and who have considerable influence with top leaders as well as with the tens of millions of “Deep State”. These people are able to finance political campaigns for politicians who advance the special interests of the international organizations.
 - a. Many of these mega-billionaires and international bankers have become tired of having to deal with troublesome self ruled countries and are moving to destroy these types of governments and move them under the UN or similar arrangement.

- b. Entites such as Black Rock control as much as 10 to 20 trillion in assets and they are on a campaign to enforce climate change and a WOLKE agend upon every public and large private company.
 - c. George Soros is believed to state that “before I die, I want to see the down fall of the United States and the elimination of all vestages of western civilization. The next year George Soros wss attributed to stating that it is time for China to replace the United States as the leading financial and miliatry power in the World.
 - d. Alexandra Soros selected Kamala Harris to be the Democratic candidate for Vice President in the 2020 election with the full support of his father George Soros as documented real time on Face Book.
 - e. There now a host of other international enemies both within and without of the United States who control vast financial and political resources who have arisen to carry on an agenda for the downfall of our Constitutional Republic.
7. Literally every member of our present Cabinet that controls the executive branch (which employees in excess of ten million excluding military or contract employees) are political ideologues who are effectively incompetent and they make up for their inability with self confidence and hubris.

B. Uncontrolled borders for United States

- 1. Effort to change the profile of the voting population
- 2. Lowers wages for workers for major industries.
- 3. Threatens national security from terrorist and from disease
- 4. Import of drugs including fentnyl are costing the lives of at least a hundred thousand of our youth per year as well as making international drug and crime cartels ever more powerful and wealthy that enables them beyond being subject to consequence for their criminal behavior.
- 5. The inflationary cost and overload of facilities and services for every level of Federal, State, and

local government and to the citizenry and this results in lower standard of living at all levels except for government officials and the very wealthy who are exempt from the consequences of the mass of dependent aliens. These include but not all inclusive::

- a. education,
 - b. health care,
 - c. law enforcement,
 - d. welfare,
 - e. deep state governance,
 - f. prisons,
 - g. natural resources,
 - h. available jobs,
6. Our nation will become like the very nations that those who seek asylum originate from. Those people who come to the US are then not providing goods and services for the countries from which they come. **Leader of many of these countries make this point quite eloquently.**
 7. The now godless United State is no longer a credible example to other countries due to our immorality, our rigged elections, our leading from behind, our mismanagement and our obvious corruptions world wide.

C. Crime

1. Crime is rampant, especially in major cities and it appears to be steadily increasing
2. There is no consequence to criminal behavior of any kind or any level.
 - a. Criminals are not incarcerated and are therefore free to continually recommit crimes
 - b. Laws are redefined to reclassify felonies as misdemeanors.
 - c. Large company retail chain stores actually punish employees who may resist shoplifting, robberies, or

- vandalism and then pass on costs to law abiding
3. People who exercise self defense and defense of property are the most likely to be prosecuted
 4. Rioters are not punished especially if activity appears to support a narrative.
 5. District Attorneys are elected with massive financial support from Mega-billionaires who appear to favor the chaos of crime and homelessness, yet punish any victim who dares to push back.
 6. Voter fraud is now simply expected and accepted and anyone who protests is punished for even thinking or stating the obvious.
- D. Unequal Application of Law and Regulation Enforcement, now at almost all levels of government. Separation of Powers is a major issue that is no more.
1. Tax laws are extremely unequal, unevenly enforced, and are used to promote political agendas at great expense and waste.
 2. Every regulatory agency of government negates the most critical principal of “separation of powers” ie
 1. The respective agencies perform rule making which is a legislative activity
 2. Enforcement of regulations along with frequent fines and types of punishment is an executive function of government by an often unaccountable agency with no regard of fundamental of Constitutional protections
 3. Most agencies have what are called “Administrative Judges” who rule on issues of whether a person or entity has is challenging whether they have violated agency defined rules and what level of punishment may be appropriate due to unfavorable findings.
- E. Out of Control Inflation is destroying the middle class and will eventually cause the financial collapse or the entire nation when

the expenditure exceed 20% of GDP long enough, and we have long surpassed that level.

1. Excessive political promises are used to buy votes ie forgiveness of student loans, the very overhead of the 10 plus millions of employees.
2. Government pursues such irrational and corrupt agenda as Climate Change which is basically an international money laundering scheme that consumes more than three trillion dollars every year. That adds to the cost of every good and service our the world population needs to survive. The result in many third world countries is a significant number of lower class simply do not survive.
3. Perpetual war promoted by military-industrial complex consumes resources at in incredible pace, especially our patriotic citizenry

F. The United States from our very beginning was second to none in education, especially for a new and developing country. We are no more even in the top levels of education, the purpose of our education system in many major cities with all of the crime, homelessness, is now simply the advancement of a combination Marxist agenda and level of perversion.

G. The United State for many decades was the leading health care and research country in the world. We have sunk to a pitiful state where we have the highest cost, yet the medical establishment has also become both wealthy and corrupt under the control of the Health Care, Pharmaceutical, governmental regulation, equipment and other suppliers of health care industry.

1. To some the opportunity for the finest levels of care still exist.
2. The average annual cost of medical care in the US according to recent Primis article is twice that of the dozen or so countries with equal level of life span and equally advanced levels of medical services.
3. Many countries faired far better from Covid-19 pandemic than the United States by use of traditional off lable

treatments using low cost existing viral medications such as Ivermectin.

4. Leading medical doctors were literally persecuted for their success in treatments that were not financially beneficial to the existing traditional medical establishment.
- H. The United States has had the leading military establishment the World has ever known, however, what has happened under almost every Democratic Presidential administration has been an unqualified disaster.
1. The danger and probable military conflicts are increasing at a worrisome rate yet the United States is seeking a WOKE agenda and our purpose to protect our nation has been subverted.
 2. The most important goal of a strong military is not the fighting of a war that is costing massive casualties, but rather to pervention of a war by projection of strength, brilliance and courage of leadership, resources, training, weapons, and technologies.
 3. Present leadership appears to be the worst in our history.
- I. The Morality of our population appears to be at an all time low.
1. Lying has risen to an all time level that pervade all aspects of our culture, business, government, personal relationships, politics in order to support an agenda,
 2. Perversion in every form that man can conceive appears to be saturating or culture with the stated objective that this behavior shall become the societal standard and any push back or failure to acknowledge these behaviors as standard will have sever consequences and all previous standards shall no longer be tolerated.
 3. The constant accusation of being a “racist” has divided our society in multiple way and has become a curse on any possibility to our society coming together.
- J. Our religious land scape is grim in comparison to what existed when our country was blessed with independence, prosperity,

incomparable freedoms, and a level of morality that possibly exceeded any time since the dark ages. Of course we had to go through the trauma of expunging slavery, but almost every member of the founding father including slave holders were in agreement that a way must be found to eliminate slavery.

1. Our Declaration of Independence and Constitution were and are based upon Biblical principals that the citizenry recognized without having to site chapter and verses because they were mostly literate based upon scriptures.
2. Many if not most functions that we now depend upon government to fulfill were carried out by the churches, especially dealing with those in true need.
3. While the collective faith has carried our countries through many crisis, civil and foreign wars, recessions, and the crisis of prosperity, and even evil influences.
4. The attack upon our religious institutions have come from an incredible number of sources, every possible strategy that evil spirits can conceive of.
5. The removal in September of 1962 of the scripture from our schools has had a profound affect on each successive generation and we are now reaping the effects of not having a level of civility and morality that permeates all aspects of our lives and may cause us to experience what King Solomon predicted for the people of Israel even at their moment of triumph.

II. Part Two is How did what we are today, “Come About”?

- A. How far should we go back in History to determine what forces and influences caused our present state.
 1. In the extreme we could go back to when The United States was a new but now powerful nation and Cecil Rhodes in South Africa would was able to persuade a number of Kings, international bankers, and world leaders of the need to have a one world government with England and the US being the single power to rule. However, out of that effort came the establishment of the Rhodes Scholer program which nearly

every major leader has gone through the scholarship training that biases thinking toward a one world government.

- a. The book entitled “The Killing of Uncle Sam” gives a frightening history from then until the present of the influences of an occultist, sometime Satan Worshipper, and world of followers who carried on much of Cicil Rhodes and his international banker supporters vision for the World.
 - b. Our mortal enemics, primarily within, have very effectively used our freedoms to promote their agendas of destruction.
2. Actually the United States has had a number of Presidents that did not serve our nation well regardless of what historian recorded.
- a. Andrew Jackson was a hero in battle, but he was responsible for abuse and killing and driving from their lands many Indians, many of whom were not hostile, but peaceful and innocent of adversarial activities.
 - b. Lincoln has been viewed as one of our greatest Presidents, but a deeper look into history, Lincole conducted the war toward the people of the south with a level of brutality toward non-combatants and non slave holders that was not necessary. This was in contrast to the vision persented by Lincoln in his Gettysburg or how to heal the nation. Actually a history of President Grant was more helpful than most of us learned about in History classes.
 - c. Woodrow Wilson, a Democrat was one of the worst Presidents who segregated both the Military and all levels of federal government, got the US into WWI, plus managed to begin much of the leftest agendas.
3. Certainly the Civil War resulted in a long term to heal the divisions of the nation. However, the freed Blacks made great strides on their own in an incredibly difficult set of circumstances. It has taken a generation to fully realize the positive impact on race relations of Martin Luther King on

the nation. Sadly there have been a major move backward by the Democratic Party while managing to bring most of the Black population on board to provide support to their deceptive programs that actually pushed race relations backward.

4. FDR, with the help of Hervert Hoover were responsible for a great leap toward socialism which likely prolonged the Great Depression that was finally mitigated by the mobilization to fight WWII. Truman was likely one of the most honest common man who unfortunately was blamed for decisions to deal with conditions he inherited.
5. The rise of Communism in the 20th century resulted in more people being slaughtered by their own governments in order to establish the takeover of numerous countries (including Russia, China, Cambodia, Cuba, Argentina, much of Central America, Viet Nam, even Germany under Hitler, and unholy alliances of Islim and Communism) and to subsequently maintain control than perished as a result of combat in all of the wars of the 20th century. It is difficult to understand how many failed to recognize the evils of various forms of Communism and Socialism.
5. Jimmy Carter managed to empower the radicals of Iran and give away the Suiz Canal now controlled by China. Plus Jummy Carter managed to start the U.S. Department of Education. He was branded in our time as the nation's worst President, again he moved the nation to more centralized control by the deep state.
6. Our nation can thank John F. Kennedy for Cuba followed by the totally corrupt LBJ for together mismanagement of the Viet Nam loss plus the Great Society that started the march towsrd dependency and national bankruptcy.
7. In September 1962, the Bible was removed from the Classroom which certainly began the moral downfall of our nation's youth
8. Nixon took the nation off of the gold standard.
9. However, the particular issues that have the greatest impact on the list of How we got where we are today, we need to

move to the Bushes and then Obama who pledged to fundamentally change America.

a. Obama was a rather complex combination of Marxist and Muslim while sort of endorsing a version of Christianity that called for the “damming of America”. However he was an incredible communicator who deceived a nation while systematically corrupting the entire Washington deep state establishment.

b. Obama went from being a dirt poor community organizer to worth unknown millions during his eight years as President. The racist Democrats were willing to accept a socialist black man if it meant the gaining of eventual power that they perceived would eventually become permanent.

10. Actually Bill and Hillary Clinton has had a major impact in the world of corruption and even the suspected cause of untimely death of perceived political risks or opposition. During the Clinton Administration, a lot of undesirable practices including ignoring of all protection of state secrets during and after that eight years until the present time. A look back at the two Bush Presidents are certainly disappointments and concern.

11. We now understand the life time of corruption of the Biden Crime Family. Because as a Senator from a small state of Delaware, much of his nefarious activities were simply ignored. While Biden served as Vice President, however, Obama was becoming extremely wealthy, but with great finesse, while Joe Biden and his family again was rather clumsy, but their activities were overlooked, especially when he was able to choose to support some popular political initiatives of the Left. The sellout has risen to the level of what “none dare call treason”.

B. The most important influence upon the movement to the Left of our federal government was the coalescing of the mega-billionaires to choose to work with the Democratic Party,

the party that had allowed the US Communist Party, renamed the Progressive Party to merge with the now Democratic party which gave essential control to the most extreme members of the party.

1. This was a sea change for the traditional Democratic party which was at one time totally loyal to traditional patriotic ideals and opposed to Republicans who were perceived to be the Party of big Companies who were insensitive to the plight of workers and unions.
2. Dinesh D'Sousa give a really interesting presentation of the evolution of the Democratic Party in full length feathure film entitled "Hillary's America" which appears to now be available on You Tube.

C. The formation of Council of Foreign Relations was an extra governmental organization believed to be under the primary control of the Rockafellow family and their associates that was responsible for creation and management of what is now believed to be a rogue agency, the Central Intelligence Agency. It was often not fully under control of the respective Presidents. There is evidence that the CIA was likely responsible for establishment of the drug trade internationally as a source of funding and was often reponsible for a number of conflicts, most often presented as conflicts in opposition to Communism.

III. What should be the Agenda of Loyal Conservative American to begin Repairing our Nation before it implodes from all of the issues that are in play as outlined in section "I." above.

A. Most important we must do what King Solomon prescribed for the nation of Israel when God turned his back on them and they fell into capitivity. In a way we as a nation may soon become captive to the United Nations and loose our self governance and Constitutional defined freedoms as is proposed with the Great Reset or BankRuptacy.

B. While the Constitutional Convention is an extreme danger in that the same forces that have gained control of our Federal

Government as well as totally corrupted our elections, the states must take a stand to be the power as was the case of the states forming the Federal Government with the power of states to make changes rather than to be subservient to the Federal Government. The reasons to oppose the Constitutional Convention include:

1. It is hard for the average citizen to recognize that there are major powers within the so called “deep state” and major internationalist mega-billionaires who now control most of the largest financial and industrial corporations as well as most of the major foundations, plus the wealthiest and most influential academic institutions, who are effectively Marxist one world proponents whereby independently governed Constitutional Republics such as the United States are no longer justifiable impediments to a one-world highly regulated government.
2. The Democratic Political party is fixated upon and is effective in selling their divine rights to rule by gaining permanent absolute political control with an agenda that includes disregard for Constitutional Protections provided by the first ten amendments, centralizing ever more states rights powers into federal agencies, selective and uneven enforcement of all federal and state laws, packing the Supreme Court with socialist ideologies, open borders to massively dilute the power and prosperity for the middle class electorate, creation of two additional states for deep state DC and guaranteed socialist representatives from dependent Puerto Rico, elimination of the electoral college so as to effectively convert our rule by laws Constitutional Republic to a rule by man Democracy, and elimination of all protections against election fraud.
3. The two part award winning documentary series entitled Agenda I how the Marxist have been able to corrupt and gain control of most of America’s political functions of government and Agenda II the secret agenda to subvert even the nations churches in order to complete the downfall and effect subservience of the United States, is a very well documented successful program that answers “how we got

to where we are”.

- a. These two documentaries are extremely painful to watch for our older generations who have witnessed the transitions and few are willing to hear the messages.
- b. The secret Agenda II should be a mandatory program to be viewed by all church leaders and devout Christians in order to recognize the evil forces so effectively destroying America’s Christian Heritage.

- C. Fundamentally, the Constitutional Republic established and gave power to the people, but they must be organized and coalesce an agenda to turn things around. It is essential to provide Equal and Fair law enforcement as well as administrate all other constitutional duties authorized by laws enacted by the Congress.
1. It is vital that every unconstitutional function being performed by the Federal Government should be returned to the States, and in some cases to the respective county or local city government.
 2. Correspondingly it is vital that the Federal Government eliminate the agencies and down size the Government
 3. Ideally the 17th Amendment should be repealed so the States regain control of their respective Senators. Now it costs a minimum of a billion dollars to run a Senate campaign and therefor a Senator must be most loyal to the entities that funded their respective campaigns rather than to the respective state they are suppose to represent.
 4. The 16th Amendment should be repealed to abolish the income tax and the IRS. It can be effectively replaced by the Congress adopting the “Fair Tax System” which would eliminate annually tens of billions of dollars of cost to both the government as well as to the civilization.
 - a. The Fair Tax would eliminate the fundamental unfairness and potential for abuse by the IRS. A tax code of many thousands of pages can never be fair or made simple with a so called Flat Tax which leaves the IRS and of the the potential for fraud or unfairness

powerful entities. The most recent of these laws is entitled as the Sherman Anti-trust law passed in 1890, subject to periodic updates through case law to apply to corporations, and any entity that due to size and exclusivity they are able to limit competition or exercise specific political power beyond the normal agenda of electing candidates for public office without having exceptional, corrupt, or monopolistic powers that cannot be duplicated by equivalent opposition entities.

- a. There are certain exceptional cases where the Congress passed law to permit a single entity, usually a capital intensive utility (ie electrical utility or wired telecommunications facilities) that would then be subject to regulation until such time as the technology and pervasive presence such that it becomes practical for additional service providers can enter the respective market.
 - b. Another exception that a particular session of Congress could empower a monopoly would be for providing critical goods and services for national defense in time of crisis or war. However, all of the above as well as similar types of situations are potentially abusive, especially if not subject sunset provisions and to periodic review.
2. A second service industry that the Congress recognized that could likely become subject to control by a single or group of limited interests or limited political interest originally was and now is the news and entertainment industry originally was and has been also subject to regulations and restrictions to avoid concentration of ownership or ownership by alien controlled organizations. The oldest examples has been the licensing of radio and television stations that use public airwave spectrum. The Federal Communication Commission began by restricting the license of a commercial radio station so that a single entity could not also own a newspaper in a community or multiple radio or TV stations. This situation became deversified thereby

permitting lifting of many original restrictions and regulation, but these particular industries have coalesced into the control of a combination of monopolistic financial and political control by a corrupted deep state, international corporate interests, mega-foundations with increasing undue influence of academia.

3. As new technologies such as privately created and developed (in some instances subsidized by government) Internet, resulting search engines, ability to catalogue and cross reference massive amounts of information, explosive sources of entertainment, instant almost unlimited news and recorded events, and particularly Social Media which pervades the population and has become a common service used by a significant percent of the domestic and now international population to the degree of being recognized and classified as a utility, now has demonstrated potential to effect public opinion even more so than the monopolistic mainstream media.

- E. The health and medical field has become both a blessing and a curse in that there are a combination public and private interests.
1. This has led and continues to lead the world in development of technologies for diagnostic procedures, development of the latest most advanced treatment technologies, and the most advanced pharmaceuticals.
 2. The creation of FDA, AMA, CDC, NIS, as well as numerous associations for each respective specialty provides leadership and information world wide. The level of scientific advancement is so massive that few medical professionals can even begin to be able to assimilate the almost daily advances that could be useful to treating patients with an increasing variety of ailments, many of which may be due to environmental pollutions and daily new chemical compounds introduced into the environment.
 3. Unfortunately, the push for man made solutions for treatments including the latest pharmaceuticals has actually been at the expense of ignoring the science in numerous

- other countries throughout the world.
4. Innovation to treatment war injuries, accident victims, and rare conditions has advanced beyond what could be comprehended as possible with upgrades almost daily by the few really innovative and dedicated medical professionals..
 5. Due to the moral and political corruption and greed of most other parts of the U.S. government, the various agencies and corporate entities have been massively affected resulting in severe limitation of potentially superior treatment options for many who suffer even due to treatable conditions simply because of financial and political options.
 - a. The consolidation of control of research and of hospitals by pharmaceutical industry in particular often limits options simply because it is not financially optimal.
 - b. Cost is out of control thereby taxing patients, insurance companies, government, and certainly indigent.
 - c. The latest pandemic has been a demonstration of total corruption by most of political and financial focused government entities as well as established medical powers that has been a major downgrading of health care that has resulted unnecessary loss of life at levels far above that experienced in many second and third world countries not subject to the politics in the United States.
 6. Actually, other countries continue to make advances in management and integration of both traditional as well as the latest new technologies from the United States.
 7. There is a crying need for major overhaul and restructuring of medical establishment and there are professional who have proposed practical changes that sadly continue to be resisted.
- F. Education for kindergarden through highschool. The Federal Government has been effective in providing food and significant technologies to support education nation wide for the prekindergarden through high school or trade school graduation.

However, the best solution to deal with the dramatic downward spiral in education is the return of money and management of education resources to the respective states. The politics of education on the federal level tends to move in all of the wrong directions. The education in the United States under combination of federal and state government has been in constant decline as well as been coopted by a perverted minority of the population to the consistent detriment of education.

- a. Parents and guardians of each child should have all vested power and school choice as has already been adopted by 31 states.
- b. Of course special needs must continue to be provided where needed and can be in the school choice model
- c. Safety will need to be provided at increased levels and the public must be willing to permit obvious solutions that might not be politically favored.

G. Higher education is in need of major upgrade and increased efficiency and less DEI, WOKEism or Marxist ideals.

1. Higher education, especially in elite universities is expensive beyond reason and especially often substandard and pitched to political agendas rather than to useful occupations.
2. Universities with large endowments that wish to promote programs that might leave students with large debt without a useful path to employment should be required to provide the loan guarantees, and not the Federal Government.
3. Universities need to no longer focus on indoctrinating students to Marxist ideals as well as even allowing and certainly not promoting censoring speech of those with whom the indoctrinated students might have been in disagreement with.
4. As per State policies, required government classes must include history and advantages of the Constitutional Republic in comparison to alternative government models.

H. The role of the Military should focus on what is Constitutional and the defined Duties and not become involved in political issues

1. Primary duties to focus on
 - a. Build the most trained and effective fighting force in the world with the best and most advanced equipment and weapons and stockpiles.
 - b. Provide the best weapons and weapons systems in the world with sufficient capability to respond to any crisis that is authorized by the Congress
 - c. Provide the best medical care and family support to the fighting forces and subsequent veterans.
 - d. Provide quality of food and personal needs of military personnel and families.
 - e. Continue to educate and train at all levels
 2. Be able to be equipped and ready so as to avoid having to go to war.
 3. Require that allies and allied countries supply sufficient resources so as to not negatively impact American forces.
 4. Make sure advancement is totally based upon merit and capability to lead effectively at all levels of command.
 5. Provide the best intelligence, communications, strategies, to always win, which appears no longer be the priority emphasis.
- I. The purpose of many of the issues is to avoid economic distress on the nation which then impacts the readiness of the military and all safety and required national infrastructure.
- J. Duties of Judiciary
1. Absolute equal justice with criterial for qualifications
 2. Efficiency and timeliness even if additional courts required
 3. Non interference to state and local issues.
