

UFOs in the News

Well, it looks like the newly crowned and enthroned **King** Charles is going to be in the “hot” seat when it comes to revelations concerning UFOs. Apart from the Brits, we have our own UAP (the new UFO acronym) hearings which are apparently stunning reporters, news casters, and many in the public. Apart from several folks many who had their own well developed opinion in this matter over the last 75 years, we will **now** discover that *we must actually deal* with the **reality**, not *possibility*, that there are other intelligent entities at work in the universe in which we live. Lions, and Tigers, and ETs, OH MY!

My purpose here today is to summarize the two overarching views regarding this issue, one of which is as old (or older) than the Bible. First, briefly put, the general public has been exposed to a naturalistic perspective where evolved beings, millions of years old, have developed super societies and travel throughout the universe with the greatest of ease. Well, before Spock, Kirk, and McCoy ancient astronauts or aliens have been darting around the cosmos until they happened on the Earth. I guess they thought we were “cute” so they left us alone. But when we started making things like *atomic bombs* and our very own *space craft*, well.....they better keep a more watchful eye on these primitive humans. Of course, there are various versions of this story which might include the discovery that we were originally placed on Earth by the AAA, our Ancient Alien Ancestors.....and we have been waiting for the family reunion ever since.

A second, very *different* story in stark contrast to one the above, involves those ancient tales referring to angels and demons, Elohim and Nephilim, giants and fairies, and other creatures which have been lumped into the general category of fairy tales or myths in our scientific age. However, the sixth chapter of Genesis in the Bible opens with a straight forward account of how angelic spirit beings came down to play hanky-panky with mankind and alter God’s designs,

plans, and purposes. As the Noahic Flood consumes the rest of Genesis 6, it seems to infer that God was not particularly happy about this situation.

Of course, this second “telling” is not the overt report you frequently hear blasted over the nightly news, though a few “still small voices” are attempting to direct our attention to this Biblical narrative. One of these is an individual, LA Marzulli, who is *coming soon to a city near you!*.....yes, that would be Lubbock, at a weekend conference sponsored by the Fellowship Church, Sept. 22-24. So, stay tuned and, of course.....**Keep Looking Up!** (the Day of the Lord draws near
